BASF
The Chemical Company

More benefits. On more crops.

You can't afford to lose precious crop yield to environmental stresses and disease. And you've seen the difference HEADLINE® can make. Have you considered what it could do for the other crops you grow? HEADLINE fungicide pushes crop production to new limits. And what makes HEADLINE so effective and unique is *AgCelence*™.

AgCelence is the optimized plant health that's only available with the active ingredient in HEADLINE. *AgCelence* translates into greener leaves, stronger stems and larger seeds. Growers confirm that this results

in a higher yielding, high quality crop with improved harvestability for cereals, pulses and flax. Make HEADLINE king on your farm. Don't forget to ask your retailer how you can save 18% on HEADLINE.

"After applying HEADLINE, we have seen an average yield increase anywhere from 6 to 14 bushels over the past 3 years on peas. In lentils, we have seen a one and a half to 3 bushel increase consistently and that is huge in lentils."

Ike Kleinsasser – Kindersley, SK

"The harvest was easier due to the fact we didn't have to cut as low because the peas stood up quite nicely – we probably cut them 6 to 8 inches high."

Mike Zbeetnoff – Canora, SK

WIN A FREE CASE!

You could WIN one of five cases of HEADLINE fungicide by simply entering your code, behind the above case of HEADLINE, at agsolutions.ca/headline. Be sure to enter no later than June 19, 2010 to qualify.

Always read and follow label directions.
