

Professional building inspection & more

RSM Building Consultants is your first and only call for everything related to building safety. We offer the most comprehensive range of services in the province, including building inspections, support and consultation, fire containment, fireplace inspections, and RSM is the inspection firm that can also provide code enforcement in Ontario.

Fire Barrier Management

Fire safety is always our top priority

As such, fire barrier management is an important, on-going process for any construction project and throughout the life of any completed facility. As an industry leader in passive fire protection inspection services such as fire and smoke damper inspections, fire door inspections, firestopping and building commissioning services. RSM can – *and has* – provided fire containment services to government buildings, hospitals, industrial, commercial and multi-residential facilities all across Ontario.

RSM Building Consultants

It's our job to know the Ontario Building Code and Ontario Fire Code inside and out, and we bring that knowledge and experience to multiple areas of need.

RSM Building Consultants

In an era of increased safety and even greater complexity, the value of specialty inspections cannot be underestimated. They can save you time, expense, and the peace of mind.
